**TEMPE COUNCIL TALK PAVEMENT**

Discuss Possibility of Street Paving, Would Be Cheaper in Long Run. Municipal Lighting Plant Also Considered

Paved streets in Tempe may become a reality at no distant date if the enthusiasm of the town's aldermen does not abate. A special session might have been held last night if the committee on the proposed municipal lighting plant had not for two hours before taking up that point good roads and street improvement were discussed and it was the consensus of opinion that pavement once installed would be cheaper in the long run than the present dirt roadways.

W. H. Caruthers, former county engineer and now representing paving interests was present and the council strongly considered the acceptance of a proposition for his company to install a single block of pavement in the town as a demonstration.

But while the possibility of pavement for a time at least, fell by the wayside, the aldermen did imbibe considerable enthusiasm that may some day result in pavement for the city. It has been a problem to keep the highways, in their present condition, in shape for travel. Either mud or dust and one or the other always with bumps and ruts exist continually and in spite of the best endeavor of the street commissioner and the money expended by the town, the task of keeping the streets as they should be has proven almost a discouraging one. City Attorney C. C. Woolf pointed out that with the money now spent for sprinkling, pumping, and continual repairs, a considerable amount of paving could be installed annually. Twenty year improvement bonds could be voted and with the town and the property sharing in the expense of laying the pavement, there would within the twenty years be a saving rather than an increased expenditure of funds.

The municipal lighting plant came up for attention. Comprehensive reports from Glendale, California and Glendale, Arizona, where the municipal plants are now in use, were presented to the council. Considerable time was passed in considering the report and while no action was taken it is quite apparent that some move will be made eventually. The committee has been continued and will proceed with its search for more data and information concerning municipally operated plants.

**MEASLES EPIDEMIC JUST SIMPLY AIN'T**

Rumors of an epidemic of measles have been going the rounds for the last few days. Dr. J. E. Drane in response to an inquiry states that there are a few scattered cases but that the great number of cases last winter left comparatively few children to become victims of the malady at this time. The doctor said, however, that Mesa is now large enough to furnish material for occasional cases of measles each year. Mr. Sherwood, school superintendent made a test of a fourth grade room yesterday and found but few who had not already had their schooling. Thus the probability of anything like an epidemic is very slight.

B. Y. P. U. PARTY  
The bay rack ride plan of the Baptist young people was changed yesterday into a social held last night at the residence of Mr. and Mrs. Fred Weeks. The participants while perfectly willing to abandon the ride to the desert could not fire the promised wiener roast and the Week's yard was used for that purpose. Quite a number of young folks were present.
